PROFILE

Artificial Intelligence student (CGPA 3.35) specializing in Machine Learning, Deep Learning, and Computer Vision. Experienced in building end-to-end computer vision and predictive models with Python and C++, including a clinical diagnostic system and real-time predictive tools. Also skilled in UI/UX and graphic design, with hands-on internship experience in frontend development and digital marketing.

EDUCATION AND TRAINING

Bachelor of Science in Artificial Intelligence <i>Pak Austria Fachhochschule Institute of Applied Sciences and Technology (PAF-IAST), Haripur — CGPA: 3.35</i>	2022 – 2026
Intermediate (Pre-Engineering) <i>Tameer-i-Millat Public School and College, Abbottabad — 1010/1100</i>	
Matriculation <i>Rose Valley Public School and College, Salhad, Abbottabad — 991/1100</i>	

WORK EXPERIENCE

UI/UX Designer & Frontend Developer <i>.dot NSTP, Islamabad</i>	Jul 2026 – Sep 2026
Data & AI Fellow <i>AuratTech Data and AI Fellowship</i>	Jul 2025 – Sep 2025
Data Visualisation Job Simulation — Forage <i>Tata — framed business scenarios, chose effective visuals, and communicated insights and analysis.</i>	Aug 2026
Technology Job Simulation — Forage <i>Deloitte Australia — development and coding simulation; proposed a business dashboard.</i>	June 2026
Data Analytics Job Simulation — Forage <i>Deloitte Australia — data analysis and forensic technology; built a Tableau dashboard and used Excel for business conclusions.</i>	June 2026
Graphic Design & Digital Marketing Intern <i>PulxeNet Pvt Ltd, IT Park, Abbottabad</i>	June 2025 – Aug 2025
Frontend Development Intern <i>Ayub Teaching Hospital, Abbottabad</i>	Aug 2024

KEY PROJECTS

- TB-Detect — Pulmonary TB Severity Detection: AI-based, CPU-optimized image-processing pipeline for automated TB severity grading from chest X-rays, 89.4% accuracy without GPU dependency.
- Real-Time Stock Price Prediction (ANN): Trained a 6-layer artificial neural network on 26 engineered stock features in TensorFlow, ~95% accuracy, deployed via a live FastAPI web interface.
- AI-Based Memory Aid and Smart Reminder System: AI-powered assistive system that detects objects, predicts user actions, and issues timely reminders for memory-aid patients.
- Bijli Audit (Ongoing): Full-stack AI-powered electricity bill auditor built with FastAPI, developed for the AuratTech Fellowship.
- Pathfinding Visualizer: Python-based AI visualizer implementing A* (heuristics), DFS, and BFS with Pygame/PyQt integration.
- Stock Price Analysis on Apache Spark: Analyzed TSLA and AAPL stock data using Apache Spark and Spark SQL on Databricks for trend identification.

SKILLS

Programming & Data: C++, Python, Java, MySQL, Data Structures & Algorithms, Big Data
Web & Full-Stack Development: HTML, CSS, JavaScript, Bootstrap, Full-Stack Development (Frontend & Backend)
Tools & Software: VS Code, Figma, Apache Spark, Databricks, Tableau, Power BI, Adobe Photoshop, Adobe Illustrator, Canva
Other: UI/UX Design, Graphic Design, Video Editing, Digital Marketing, Teamwork & Problem Solving

CERTIFICATIONS

- AI, Algorithms and Opportunities Seminar — Technik Nest Pvt Ltd
- Modern MERN Stack Development with Generative UI Webinar — Tech Fusion 1.0
- Video Editing and Animation Course (1.5 months) — Learning with Earning Academy
- Digital Marketing Course
